

## WATER RATES

### **Outdoor Underground Sprinkler Water Use Volunteer Program**

**In an effort to control costs relating to water usage, the City of Allen Park is requesting that all residents and business owners restrict the run time of their underground irrigation sprinkler systems to operate between the hours of:**

.....▶ **11 p.m. and 5 a.m. daily** ◀.....

**This change of timing will decrease the amount of peak hour water use which can translate into annual savings for water users in the City of Allen Park.**

**The focus of this change is to reduce peak usage, and by lowering our peak usage, it may result in lower water rates.**

**Water users may manually irrigate their landscaping at any time as long as the irrigation is not connected to an underground sprinkling system and is attended and monitored by the user.**

**Thank you in advance for your cooperation.**
