COVID-19 OUTBREAK

SITUATION REPORT - 45.1

APRIL 8, 2020

For Operational Period: April 7, 2020

WORLDWIDE

1,444,822 Confirmed
83,109 Deaths

UNITED STATES

400,549 Confirmed
12,857 Deaths

MICHIGAN

18,970 Confirmed
845 Deaths

OUT-WAYNE COUNTY

3,513 Confirmed
180 Deaths

SITUATIONAL AWARENESS

- At this time in Michigan:
 - The City of Detroit has the highest number of reported cases and deaths with a total of 5,476 confirmed cases and 222 deaths.
 - The current percentage of males affected by COVID-19 is 46% and 51% for females, 3% unknown gender.
 - The current percentage of mortality for males is 58% and 42% for females.
 - The largest age-group of cases is 50-59 years old with 20%.
- Michigan House and Senate have voted and extended the State of Emergency Declaration through April 30th.
- Senate Democrats have proposed hazard pay for up to \$25,000 for essential workers such as grocery store clerks, janitors, truck drivers, and doctors who earn less than \$200,000/year. Additionally, it would offer up to \$15,000 for medical workers as an incentive for essential worker recruitment.
- A recent two-week study in New York revealed that the majority of pregnant women with COVID-19 do not experience more severe symptoms than the general population. About 80% of the participants experienced mild symptoms, 15% experienced more severe symptoms, and 5% were in critical condition. The study also revealed that no babies were born infected.

ACTIONS TAKEN

- The Public Health Emergency Operations Center (PHOC) is at FULL ACTIVATION.

STRESS & COPING

Disaster Distress Helpline: 1-800-985-5990

National Domestic Violence Hotline: 1-800-799-7233 and TTY 1-800-787-3224

The outbreak of coronavirus disease 2019 (COVID-19) may be stressful for people. Fear and anxiety about a disease can be overwhelming and cause strong emotions in adults and children. Coping with stress will make you, the people you care about, and your community stronger.

Everyone reacts differently to stressful situations. How you respond to the outbreak can depend on your background, the things that make you different from other people, and the community you live in.

Stress during an infectious disease outbreak can include

- Fear and worry about your own health and the health of your loved ones
- Changes in sleep or eating patterns
- Difficulty sleeping or concentrating
- Worsening of chronic health problems
- Increased use of alcohol, tobacco, or other drugs
