6,342,385 Deaths

UNITED STATES

85,921,461 Cases

1,008,196 Deaths

MICHIGAN

2,242,134 Cases

33,676 Deaths

OUT-WAYNE COUNTY

274,099 Cases

4,122 Deaths

SITUATIONAL AWARENESS

- In **Wayne County, Michigan**, community level is **Low**.
- Wayne County dashboard may be found at www.waynecounty.com/COVID19dashboard for latest community updates.
- Wash your hands often. Use soap and water for at least 20 seconds. If you do not have soap and water, use hand sanitizer with at least 60% alcohol. —**CDC**
- Children and teens ages 5 through 17 years who are moderately or severely immunocompromised will need a third dose to complete their primary series, as well as boosters if eligible. —**CDC**
- New variants of a virus happen because the virus that causes COVID-19 constantly changes through a natural ongoing process of mutation (change). As the virus spreads, it has more opportunities to change. High vaccination coverage in a population reduces the spread of the virus and helps prevent new variants from emerging. —**CDC**
- Exact vaccine ingredients vary by manufacturer. Pfizer-BioNTech and Moderna COVID-19 vaccines also contain messenger RNA (mRNA) and the Johnson & Johnson/Janssen COVID-19 vaccine contains a harmless version of a virus unrelated to the virus that causes COVID-19. These give instructions to cells in your body to create an immune response. This response helps protect you from getting sick with COVID-19 in the future. After the body produces an immune response, it discards all the vaccine ingredients just as it would discard any information that cells no longer need. This process is a part of normal body functioning. —**CDC**
- If you test positive for COVID-19 or if you have been exposed it is important that you immediately take steps to get the care you need and avoid giving COVID-19 to people around you -Contagious: You can be contagious two days before symptoms appear (or two days before test date if positive and no symptoms) through the end of the isolation period. —**MDHHS**

ACTIONS TAKEN

- The Public Health Emergency Operations Center (PHOC) is at FULL ACTIVATION.
