

COVID-19 OUTBREAK

COVID-19 BRIEFING - 321.1

SEPT 12, 2022

For Operational Period: Sept 5, 2022—Sept 12, 2022

WORLDWIDE

603,711,760 Cases

6,484,136 Deaths

UNITED STATES

94,973,074 Cases

1,044,461 Deaths

MICHIGAN

2,412,147 Cases

34,818 Deaths

OUT-WAYNE COUNTY

298,453 Cases

4,278 Deaths

SITUATIONAL AWARENESS

- Wayne County is currently in **MEDIUM** overall community levels
- Wear a mask indoors and on public transportation -see Wayne County Covid-19 webpage for further recommendation www.waynecounty.com/COVID19dashboard
- Wayne County is offering the **Bivalent Booster** for ages 12 and older. You're eligible to receive this *booster* if it has been at least 2 months since completing your primary series or receiving your last booster dose —**WC**
- If you have COVID-19 you can spread the virus to others. There are precautions you can take to prevent spreading it to others: isolation, masking, and avoiding contact with people who are at high risk of getting very sick. Isolation is used to separate people with confirmed or suspected COVID-19 from those without COVID-19 —**CDC**
- Antibodies**- usually develop 1-3 weeks after infection with the virus that causes COVID-19, and antibody tests are not generally recommended to test for current infection. To find out if someone has a current infection with the virus that causes COVID-19, the best choice is a viral (antigen or PCR-based) test—**CDC**
- New variants of a virus happen because the virus that causes COVID-19 constantly changes through a natural ongoing process of mutation (change). As the virus spreads it has more opportunities to change. High vaccination coverage in a population reduces the spread of the virus and helps prevent new variants from emerging—**CDC**
- It takes several weeks after each dose of COVID-19 vaccine for your body to develop maximum levels of immunity – you are not protected right away. We still don't know exactly how long protection from COVID-19 vaccines lasts but most people have strong protection against serious illness and death for at least 6 months —**WHO**

ACTIONS TAKEN

- The Public Health Emergency Coordination Center (PHECC) is at FULL ACTIVATION.
